15B. CONTRACTOR/OFFEROR	15C. DATE SIGNED	16B. United States of America BY _____	16C. DATE SIGNED
<i>(Signature of person authorized to sign)</i>		<i>(Signature of Contracting Officer)</i>	

3.8.2 The Contractor's operations shall fully comply with the "Reclamation Safety and Health Standards" and amendments or revisions thereto. One copy of this handbook will be provided to the contractor, upon request.

3.8.3 The Contractor's operations shall be performed by methods that will prevent entrance, or accidental spillage, of solid matter, contaminants, debris, or other pollutants or wastes into streams, flowing or dry watercourses, lakes, wetlands, reservoirs, or underground water sources. Such pollutants and wastes include, but are not restricted to, refuse, garbage, cement, concrete, sanitary waste, industrial waste, radioactive substances, oil and other petroleum products, aggregate processing tailings, mineral salts, and thermal pollution.

3.8.4 The Contractor shall be responsible for the cleanup and disposal of waste materials and rubbish. The disposal of waste materials and rubbish shall be in accordance with applicable Federal, State, and local laws and regulations, and with applicable requirements of Reclamation's "Construction Safety Standards."

3.9 Drilling Permits, Licenses, and Permission to Drill

The Contractor shall be responsible for obtaining at his own cost any and all state and local permits and licenses which may be required by state or federal law to perform the work defined in these specifications.

4. Cessation of Work

Reclamation reserves the right to terminate the testing program at any time, to stop the testing of any borehole at any time and to require the Contractor to complete the partially finished hole/holes in accordance with the section titled **Completion of Becker Soundings**.

5. Access to Drilling Area

Reclamation will provide access to the drilling area as well as assist in facilitating any access issues due to dam security requirements. The contractor should anticipate that each crew member may be required to obtain a security pass for working on the dam site.

Access to the dam is via U.S. Highway 12 west of Yakima. From the highway, access to the embankment is available via a single lane gravel access roads. Reclamation will provide access to the Contractor through the locked gate near the damtender's office. Access to the dam crest is available via a single lane gravel access road on the right abutment of the dam. Reclamation has constructed single-lane access ramps from the dam crest to the drill sites on the upstream face of the embankment last year for an earlier phase of test drilling that used a Government drill rig of similar size to that needed for the Becker testing. Reclamation equipment and forces will be available to assist the Contractor's equipment, if needed.

6. Materials and Services to Be Provided by the Government

Provide, on request, a copy of Reclamation's Safety and Health Standards.

6.1 Provide road access and drill pads for investigation equipment to each investigation location. Contractor is responsible for visiting the site and determining needs for any additional access.

6.2 After completion of the investigation program, all BPT holes will be surveyed by Reclamation.

6.3 Provide the automated data logger equipment that is to be connected to the bounce chamber pressure meter. In addition to the hole monitoring required by the Contractor's personnel, Reclamation personnel shall be allowed to observe the automated equipment.

6.4 Provide field and office personnel for logging holes, collecting logger information, and reviewing collected data. Reclamation's technical contact personnel for field work performed under this Delivery Order will be personnel of the Technical Service Center (TSC), Denver, Colorado and the Pacific Northwest Regional Office.
